BILAG 2

Søgestrategi

Fokuseret spørgsmål 1:

Hvilken effekt har brug af sterilt saltvand eller sterilt vand sammenlignet med postevand og sæbe til vask af meatusområdet hos den voksne indlagte patient før anlæggelse af KAD med henblik på reducering af kateterrelaterede infektioner?

Population	Intervention	Alternativ	Outcome
Alle voksne > 18 år	Anlæggelse af kateter á demeure hvor patient afvaskes med steril vand eller steril saltvand. MeSH-term: Urinary catheterization, urethral catheterization, bacteriuria, nosokomial infections, catheter related infections. Fritekst: Indwelling urinary catheter, indwelling catheter, management, indwelling urethral catheter	Anlæggelse af kateter á demeure hvor patient afvaskes med postevand og sæbe. MeSH-term: Urinary catheterization, urethral catheterization, bacteriuria, nosokomial infections, catheter related infections. Fritekst: Indwelling urinary catheter, indwelling catheter, management, urethral catheter	Minimering af forekomsten af urinvejsinfektion grundet kontaminering ved anlæggelse.

CENTER FOR KLINISKE RETNINGSLINJER

- CLEARINGHOUSE

Alle voksne > 18 år	Anvendelse af sterile handsker ved anlæggelse af kateter á demeure. MeSH-term: Surgical gloves	Anvendelse af rene handsker ved anlæggelse af kateter á demeure. MeSH-term: Protective gloves	Minimering af forekomsten af urinvejsinfektion grundet kontaminering ved anlæggelse.

Fokuseret spørgsmål 2:

Hvilke afvaskningsmidler kan anbefales til rengøring af meatusområdet, og hvor ofte bør meatusområdet rengøres i kateteriseringsperioden med henblik på reducering af kateterrelaterede infektioner hos den voksne (18 år eller derover) indlagte eller ambulante patient, der bærer uretral, permanent kateter?

Population	Intervention	Alternativ	Outcome
Alle voksne > 18 år	<p>1) Afvask efter fastlagt skema en eller flere gange dagligt.</p> <p>2) Afvask med postevand og sæbe.</p> <p>MeSH-term: Urinary catheterization, indwelling catheter, bacteriuria, nosokomial infections, catheter related infections.</p>	<p>1) Ingen rutinemæssig afvask.</p> <p>2) Afvask med andre midler.</p> <p>MeSH-term: Urinary catheterization, indwelling catheter, bacteriuria, nosokomial infections, catheter related infections.</p>	<p>Minimering af forekomsten af urinvejsinfektion grundet kontaminering i kateteriseringsperioden.</p>

Fokuseret spørgsmål 3:

Hvilken uretral, permanent katetertype og størrelse kan anbefales til brug hos den voksne (18 år eller derover) indlagte eller ambulante patient med henblik på at reducere forekomsten af kateterrelaterede infektioner?

Population	Intervention	Alternativ	Outcome
Alle voksne > 18 år	Anvendelse af sølvcoatet kateter ved anlæggelse af kateter á demeure. MeSH-term: Silver alloyed catheter, bacteriuria, nosocomial infections, catheter related infections. Ingen fundet for short-term eller long-term catheter. Fritekst: Short-term urinary catheter, urinary catheter, size, urethral catheter, urethral catheter type, indwelling urethral catheter type, indwelling foley catheter, foley catheter,	Anvendelse af andre katetertyper ved anlæggelse af kateter á demeure. MeSH-term: Ingen fundet for short-term og long-term catheter, bacteriuria, nosokomial infections, catheter related infections. Fritekst: Short term urinary catheter	Hvilken type kateter minimerer kateterrelateret urinvejsinfektion ved henholdsvis korttids- og langtidskateterisering.

Fokuseret spørgsmål 4:

Hvilken væske kan anbefales til opfyldning af ballonen i det permanente kateter hos voksne (18 år eller derover) indlagte eller ambulante patienter?

Population	Intervention	Alternativ	Outcome
Alle voksne > 18 år	Anvendelse af glycerin ved opfyldning af kateterballon. MeSH-term: Glycerine Fritekst: Glycerine, urinary catheter balloon, urinary catherization, urethral catheter, urinary catheter	Anvendelse af sterilt vand eller sterilt saltvand ved opfyldning af kateterballon. MeSH-term: Sterile water Sodium chloride Fritekst: Urinary catheter balloon, urinary catheterization, urethral catheter, urinary catheter	Diffusion af væske fra ballonen. Forekomst af problemer med at tømme ballon ved seponering.

Fritekst:

- urinary catheter balloon.
 - urethral catheter
 - urinary catheter
